

WEAVER® MOUNT

WEAVER® EXTENSION DETACHABLE TOP MOUNT

WARNING

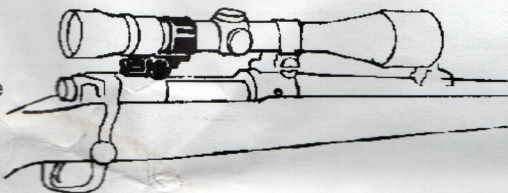

UNLOAD FIREARMS BEFORE INSTALLATION TO PREVENT SHOOTING ACCIDENTS.

A Weaver Extension Ring with a Detachable Top Mount is necessary for use with large objective end scopes, variable power scopes, or the newer compact scopes.

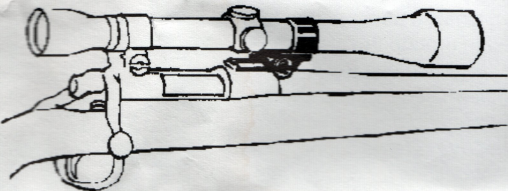

VARIABLE SCOPES

Extension Ring used on rifle's receiver bridge permits scope to be positioned $\frac{3}{4}$ " further forward for improved eye relief.

HIGH MAGNIFICATION SCOPES

Extension Ring used on rifle's front receiver ring provides wider ring spacing and reduces scope overhang on longer scopes.

COMPACT SCOPES

Extension Ring reversed on rifle's front receiver ring provides narrower spacing to fit compact scopes.
